Copy 8 of 8

19 February 1963

MEMORANDUM FOR: Chief, Operations Division

SUBJECT : [] IDEALIST Deployments

25X1C

25X1A

25X1C

1. On 18 February 1963, [] Security Officer, Det. 2, now on TDY at Headquarters, was interviewed in order to solicit his ideas and suggestions on handling of security matters for Deployments []

25X1A

2. He pointed out the inevitable cross-fertilization that has occurred between Det. 3 and Det. 2, with personnel from both units having gained expanded knowledge of [] Operations and Procedures. This situation will of course be monitored, to help prevent compromise of both operations.

25X1A

3. [] had some observations and questions that are of immediate concern to GSA Operations.

25X1C

25X1A

B. [] advised that the present hangar can accommodate two aircraft if a new building is built to house Det. 2 supplies and food supplies. This again would result in an expense that would not normally be incurred by Det. 2.

25X1A

25X1C

C. [] desired to explore, on an informal basis, the possibility of additional deployment [] during the next calendar year; an affirmative answer would give critical priority to the construction items mentioned above.

NOT TO BE RELEASED

4. From a security viewpoint it would be far more desirable to conceal both aircraft in one hangar, rather than resorting to construction of a pre-fab hangar outside the compound fence to house one of the aircraft.

5. This information is provided for your information, assistance, and comment.
